-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 6) ☐ Other: ____.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 9, 12, 17-in-full and claims 4-6, 11, 14, 15-in-part, drawn to a method for identifying probabilities of molecular interactions, classified in class 703, subclass 12.
- II. Claims 2, 3, 7, 8, 10, 13, 16-in-full and claims 4-6, 11, 14, 15-in-part, drawn to a method for identifying probabilities of protein interactions, classified in class 703, subclass 11.

The inventions are distinct, each from the other because of the following reasons:

Invention I and II are separate and distinct, as they are drawn to computing probabilities of interactions between differing groups or types of matter. Invention I is drawn to interactions between molecules which include chemicals, pharmaceuticals, and any other type of molecule, while Invention II is drawn to interactions between proteins, which have a complex structure and complicated structure/function relationships. It is noted that several dependent claims depend from both Inventions- these limitations do not render the methods one and the same, and do not negate the separate nature of the inventions. The searches for each Invention would only be minimally co-extensive, with each invention requiring significant search efforts in differing areas of literature. As such, it would pose a significant burden upon the examiner if the inventions were not restricted.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1631

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mary K Zeman whose telephone number is 571-272-0723.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael P Woodward can be reached on 572 272 0866.
